S.No: 5	Exp. Name: *Solving Expression*	Date:2024-10-10

Aim:

Write a C code to solve the expression as 3*2/3+5

Source Code:

evaluate.c

```c
#include <stdio.h>
int main() {
    double result;
    // Evaluate the expression
    result = 3*2/3+5; // write your code here
    // Display the result
    printf("Result: %.2lf\n", result); // write your code here
    return 0;
}
```

Execution Results - All test cases have succeeded!

Test Case - 1
User Output
Result: 7.00
